Agenda

Current Shipping Instruction Process

1 **B/L Data Input to System**

2 **Sending to Carrier manually**

Fax

E-mail

website input
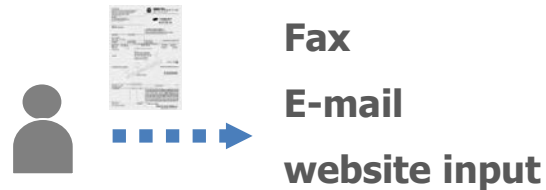

3 **Several conversations & Multiple correction**

Carrier PIC

Fax

E-mail

website input
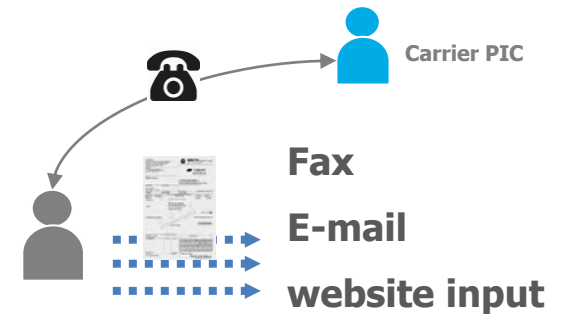

Inconvenient Point

- Double input the B/L data and documentation fee → Waste of Time & Cost
- Inaccuracy caused by human error
- Documentation delay due to multiple correction

Agenda

01   **What is SmartLink SI Service ?**

**02**   **Why SmartLink SI Service ?**

Improvement 1. No need of Double Input

- One Click and Sending Shipping Instruction using B/L data which is arleady input in OPUS Forwarding.
- Customer doesn't need to input shipment documents in the carrier's website any more.

Improvement 2. Waiver of Documentation Fee

- Some carriers are charging documentation fee for shipment documents via Fax or Email.
- Documentation fee can be waived after transmitting shipment documents via SmartLink EDI.

CyberLogitec

Improvement 3. Speediness and Correctness

- Fast submition shipment documents to carrier before documention cut off time.

- No need of several calling and multiple correction.

- Transmit shipment documents automacally by EDI and receive accurate response from carriers.

Several calling and mutiple correction

EDI

Draft BL
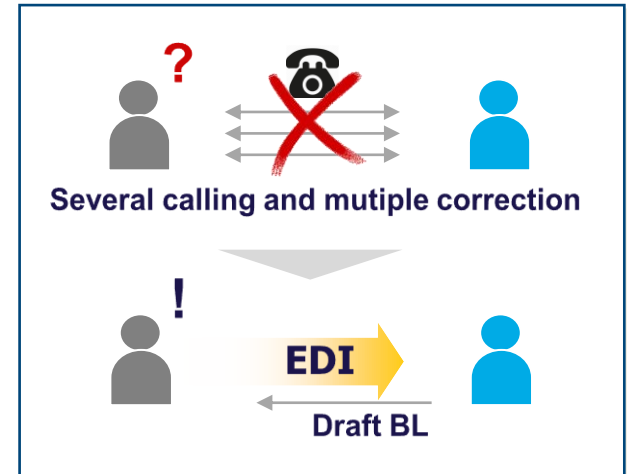

Improvement 4. Prepare for VGM regulations

- Shipper or Freight Forwarder should send verified cargo and container weight information to carriers to comply with Verified Gross Mass regulations of SOLAS.

- SmartLink can send verified cargo and container weight information including shipment documlents EDI.
