Advance Notice of the Result of Risk Analysis

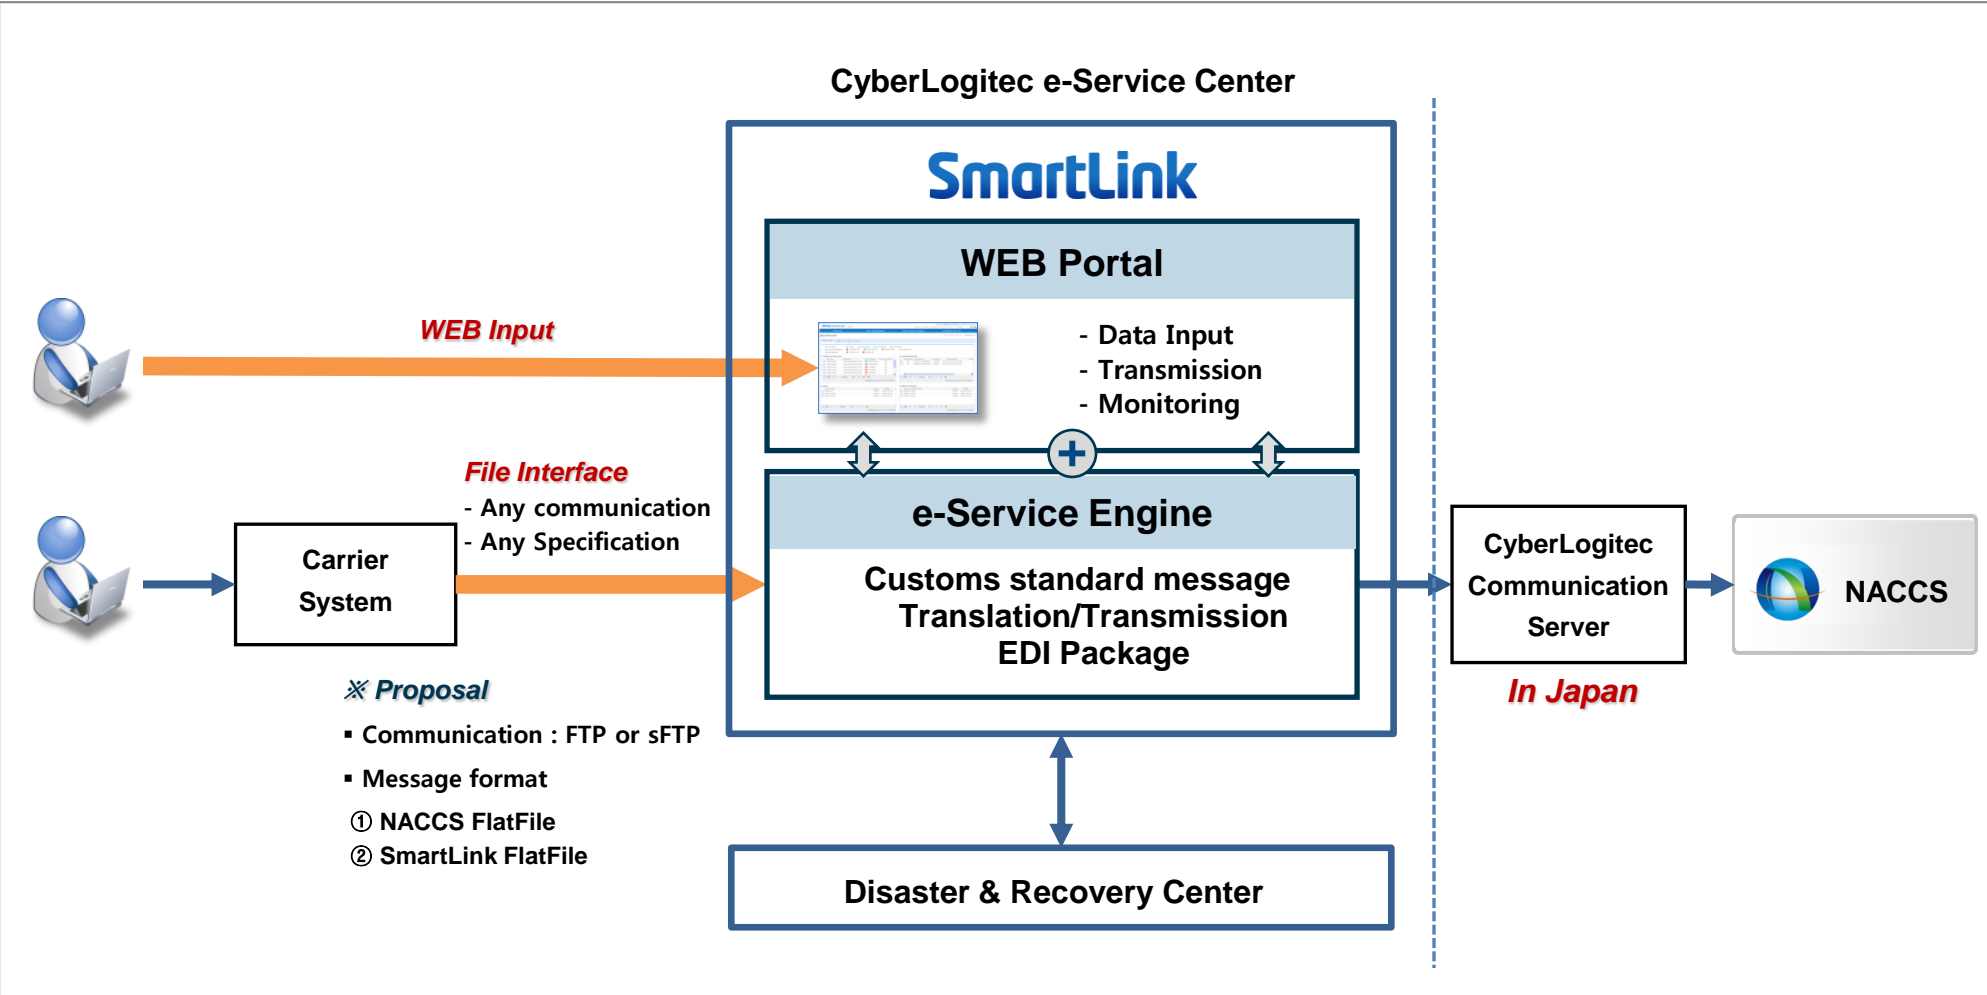

* Receiving CDN message within 24 hours after the advance filing. (Completion of Screening & Prior Notification)

Code	Description	Summary of the Advance Notice
DNL	Do Not Load	This code of message is notified for recommending to abandon the loading of cargo on a vessel in case the Japan Customs identify the high-risk cargo from the viewpoint of Japanese security as a result of risk analysis of the cargo information filed 24 hours before loading of the cargo.
HLD	Holding	This code of message is notified for requiring addition or correction of information to complete risk assessment of informed cargo.
DNU	Do Not UnLoad	This code of message is notified for requiring to suspend the discharge of cargo from the vessel in Japan. in case the Japan Customs identify the high-risk cargo from the viewpoint of Japanese security as a result of risk analysis of the cargo information after the vessel departed from a port of loading,
		This code of message is notified when the vessel departed from a port of loading without canceling the code of message of the "HLD".
SPD	Suspending	This code of message is notified when the cargo information is not filed. ※Also, penal provisions could be applied. An operator must file the cargo information and cannot unload the cargo without the permission of discharge by Customs.
		This code of message is notified when the cargo information was filed after the deadline. ※Also, penal provisions could be applied. An operator cannot unload the cargo without the permission of discharge by Customs.
